

# Nassim Sai

## Network Security Engineer

Tunis, Tunisia | +216 55 870 738 | saynassim12@gmail.com | linkedin.com/in/nassim-sai | github.com/nassim-sai

Open to relocation across the EU • requires work-permit sponsorship • available immediately

### PROFILE

Network and cloud security engineer, graduated 2026 with an engineering degree in Computer Systems and Network Security. I build defensive infrastructure and then instrument it — segmented enterprise networks behind redundant firewalls, NOC/SOC stacks on Wazuh, Suricata and ELK, and a six-service ML-driven security observability platform for OpenShift, delivered as my end-of-studies project at NextStep IT.

### CORE SKILLS

|                          |                                                                                                                                                      |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Network Security         | Cisco IOS • pfSense • FortiGate • VLAN segmentation • OpenVPN, IPsec, MPLS VPN • OSPF, BGP • firewall policy design • NAC • DNS                      |
| Cloud Native & Detection | Kubernetes • OpenShift 4 • NetworkPolicy • Kyverno • Docker • SIEM operations • Wazuh • Suricata • Snort • ELK • Grafana • Prometheus • MITRE ATT&CK |
| Systems & Programming    | Windows Server • Active Directory • FreeRADIUS • Linux hardening • VMware • GNS3 • Python (FastAPI, scikit-learn) • C++ • Java • PostgreSQL          |
| Governance & Languages   | ISO/IEC 27001 ISMS, logging and traceability design • Arabic native, English advanced, French intermediate                                           |

### PROFESSIONAL EXPERIENCE

**Network & Security Engineer — End-of-Studies Engineering Internship** Jan 2026 – May 2026  
NEXT STEP IT | Tunis — hybrid

- Designed and delivered the **NetworkPolicy Intelligence System**, a six-service security observability platform for OpenShift/Kubernetes, in partnership with TEK-UP University.
- Built the pipeline end to end: OVN-Kubernetes ACL drop logs → Fluent Bit/Loki → flow baselining → ML anomaly detection → FastAPI REST/SSE → React dashboard.
- Implemented an 8-rule NetworkPolicy audit engine producing per-namespace compliance scores graded A–F, with LLM inference kept on-cluster so **no cluster data leaves the perimeter**.

**Network Security Intern** Jun 2025 – Jul 2025  
Tunisie Telecom | Tunis — hybrid

- Designed and deployed a segmented enterprise architecture: 5 VLANs (DMZ, Management/NOC, Staff, HR, IT) behind a **redundant high-availability pfSense firewall pair**, plus site-to-site OpenVPN tunnels linking headquarters to a branch office.
- Integrated Suricata IDS with an ELK correlation stack and a Zabbix NOC dashboard supervising **12+ critical hosts** with severity-classified alerting; deployed Windows Server Active Directory for centralised authentication.

**IoT Systems Intern** Feb 2023 – Jul 2023  
Compagnie des Phosphates de Gafsa (CPG) | Gafsa — real-time industrial weighing and traceability on Raspberry Pi + SIM808, streaming to ThingsBoard

### SELECTED PROJECTS

**NetworkPolicy Intelligence System — flagship** [nassim-sai/netpol-intelligence](#) 2026  
Six microservices on OpenShift 4.21 — Fluent Bit/Loki collection, Welford flow baselining, Z-score and Isolation Forest detection, live policy audit, on-cluster LLM, React 18 dashboard on TimescaleDB.

**Secure NOC & VPN Infrastructure** [nassim-sai/Secure-NOC-VPN-Infrastructure](#) 2025–2026  
Enterprise telecom reference architecture: HA pfSense pair, five-VLAN segmentation, encrypted inter-site tunnels, IDS-to-SIEM correlation, supervised NOC dashboard.

**ISMS Security Architecture — NAC, Central Logging & ERP Hardening** [nassim-sai/Secure-Network-Project](#) 2025  
ISO/IEC 27001-aligned: identity-based NAC, FreeRADIUS and Active Directory authentication, Wazuh SIEM analysis, hardened containerised ERP. Also built: an open-source NOC (NOC\_Project) and a Raspberry Pi security appliance (Secure-Portable-Router).

### EDUCATION & CERTIFICATIONS

**Engineering Degree — Security of Computer Systems and Networks** Sep 2023 – Jul 2026  
TEK-UP University of Digital Sciences | Tunis, Tunisia

**Bachelor’s Degree — Electronics, Electrical Engineering & Automation** Sep 2020 – Jul 2023  
ISIMM, Monastir | Monastir, Tunisia

**Certified (2026)** Fortinet NSE 1, NSE 2, NSE 3 • Cisco Introduction to Cybersecurity • Cisco Networking Basics • AWS Foundations of Prompt Engineering

**In progress** Cisco Junior Cybersecurity Analyst (CCNA + CyberOps) • Microsoft SC-900 • Azure security • Fortinet FortiGate Administrator (NSE 4)
