

Nassim Sai

Network Security Engineer

Ariana, Tunis, Tunisia | +216 55 870 738 | saynassim12@gmail.com | linkedin.com/in/nassim-sai | github.com/nassim-sai

Available immediately • open to relocation to the UAE, Saudi Arabia, Kuwait and Qatar

PERSONAL DETAILS

Nationality & status	Tunisian • born in 04-01-2000 • Single • driving licence : Yes
Availability	Requires employment visa sponsorship (no GCC residency currently held) • notice period: immediate
Languages	Arabic — native • English — advanced • French — intermediate

PROFESSIONAL SUMMARY

Network and cloud security engineer, graduated 2026 with a three-year engineering degree in Computer Systems and Network Security. Hands-on across the defensive stack — segmented enterprise networks behind redundant firewalls, NOC/SOC build-outs integrating SIEM and IDS, ISO/IEC 27001-aligned logging, and a six-service machine-learning security observability platform for OpenShift delivered in industry.

CERTIFICATIONS & TRAINING

Fortinet	NSE 1, NSE 2, NSE 3 — Certified in Cybersecurity (2026) • FortiGate Administrator (NSE 4) — in progress
Cisco	Introduction to Cybersecurity (2026) • Networking Basics (2026) • Junior Cybersecurity Analyst (CCNA + CyberOps) — in progress
Microsoft & AWS	SC-900 and Azure security paths — in progress • SC-200 — planned • AWS Foundations of Prompt Engineering (2026)

KEY SKILLS

Network Security	Cisco IOS • pfSense • FortiGate • VLAN segmentation • OpenVPN, IPsec, MPLS VPN • OSPF, BGP • NAC • DNS • high availability
SOC & Governance	SIEM • Wazuh • Suricata • Snort • ELK • Zabbix • Grafana • Prometheus • log correlation • incident response • MITRE ATT&CK • ISO/IEC 27001 ISMS
Cloud, Systems & Code	Kubernetes • OpenShift 4 • Docker • Windows Server • Active Directory • FreeRADIUS • Linux hardening • VMware • GNS3 • Python • C++ • SQL

PROFESSIONAL EXPERIENCE

Network & Security Engineer — End-of-Studies Engineering Internship Jan 2026 – May 2026
NEXT STEP IT | Tunis, Tunisia

- Designed and delivered the **NetworkPolicy Intelligence System**, a six-service security observability platform for OpenShift/Kubernetes, in partnership with TEK-UP University.
- Built an 8-rule policy audit engine producing per-namespace compliance scores graded A–F, plus a three-tier anomaly detection pipeline (statistical, rule-based and machine learning).
- Kept all analysis and LLM inference on-cluster so **no customer data leaves the perimeter**.

Network Security Intern Jun 2025 – Jul 2025
Tunisie Telecom | Tunis, Tunisia

- Designed and deployed a segmented enterprise network: 5 VLANs (DMZ, Management/NOC, Staff, HR, IT) behind a **redundant high-availability pfSense firewall pair**, with site-to-site OpenVPN tunnels between headquarters and a branch office.
- Integrated Suricata IDS with an ELK log-correlation stack and a Zabbix NOC dashboard supervising **12+ critical hosts**; deployed Windows Server Active Directory for centralised authentication.

IoT Systems Intern Feb 2023 – Jul 2023
Compagnie des Phosphates de Gafsa (CPG) | Gafsa — real-time industrial weighing and traceability on Raspberry Pi + SIM808, streaming to ThingsBoard

KEY PROJECTS & EDUCATION

NetworkPolicy Intelligence System — flagship [nassim-sai/netpol-intelligence](#) 2026
Six microservices on OpenShift 4.21 — Fluent Bit/Loki collection, flow baselining, Z-score and Isolation Forest detection, live policy audit, on-cluster LLM, React 18 dashboard.

Also on github.com/nassim-sai: Secure NOC & VPN Infrastructure (HA pfSense pair, five-VLAN segmentation, site-to-site OpenVPN, Suricata-to-ELK, Zabbix NOC) • ISO/IEC 27001 ISMS architecture (NAC, FreeRADIUS/AD, Wazuh SIEM, hardened ERP) • open-source NOC with Snort and GLPI.

Sep 2023 – Jul 2026 Engineering Degree — Security of Computer Systems and Networks • TEK-UP University of Digital Sciences, Tunis
Sep 2020 – Jul 2023 Bachelor's Degree — Electronics, Electrical Engineering & Automation • ISIMM, Monastir
